

Vocational Education — Cbse Chapter Test — 20 Marks

Subject: Vocational Education | Class: Class 8

Total Marks: 20 | Time Allowed: 0h 40m | CBSE

General Instructions:

1. Read all questions carefully before answering.
2. All questions are compulsory unless stated otherwise.
3. Marks for each question are indicated on the right.
4. Write neatly and legibly.

Q.NO.	QUESTIONS	MARKS
Section A Attempt all 8 questions. Each carries 1 mark(s).		
1	When uploading a programme to an Arduino Uno, what must be selected in the Tools menu under Port? (A) USB Port 1 (B) Serial Monitor (C) Arduino Uno Com (D) Board Manager <i>[Ch 4: Project 4: Home Automation]</i>	1
2	What are the three key steps in the automation cycle? (A) Switching, Connecting, and Breaking (B) Input (Sensing), Processing (Decision making), and Output (Action) (C) Designing, Drawing, and Printing (D) Building, Testing, and Selling <i>[Ch 4: Project 4: Home Automation]</i>	1
3	In Activity 2, students are instructed to make simulated circuits. Which components and their specifications are correctly mentioned in the chapter for this activity? (A) LED, 100 ohms resistor, DC battery 6V, and switch (B) Buzzer, 330 ohms resistor, AC battery 12V, and button (C) LED, 220 ohms resistor, DC battery 9V, switch and buzzer with same specifications (D) Motor, 470 ohms resistor, DC battery 5V, and relay <i>[Ch 4: Project 4: Home Automation]</i>	1

Q.NO.	QUESTIONS	MARKS
4	In an automatic garden irrigation system, what happens when the soil becomes too dry? (A) The motion sensor detects movement in the garden (B) The system turns off the water pump immediately (C) The moisture sensor sends a signal to turn on the water pump (D) The temperature sensor measures the soil temperature <i>[Ch 4: Project 4: Home Automation]</i>	1
5	Which example from nature demonstrates automation similar to GPS used by humans? (A) Lungs breathing in oxygen (B) Water evaporating from lakes (C) Stomach digesting food (D) Birds migrating without GPS <i>[Ch 4: Project 4: Home Automation]</i>	1
6	After writing a programme in Arduino IDE, Priya wants to upload it to her Arduino Uno board. What steps should she follow according to the chapter? (A) Connect the LED to analog pins and press the reset button (B) Open the tools menu, go to examples, and select basics (C) Change the value in the delay command and save the file (D) Connect the Arduino board to the computer using its cable, go to the tools menu, select the port, and click the upload arrow <i>[Ch 4: Project 4: Home Automation]</i>	1
7	Which of the following is an example of natural automation in the human body? (A) Reading a book (B) Heart beating to pump blood (C) Walking and running (D) Speaking to a friend <i>[Ch 4: Project 4: Home Automation]</i>	1
8	Which of the following is mentioned as a job related to automation work? (A) Chef (B) Automation engineer (C) Doctor (D) Mechanic <i>[Ch 4: Project 4: Home Automation]</i>	1
Section B Attempt all 3 questions. Each carries 2 mark(s).		
9	Name three jobs related to automation work.	2

Q.NO.	QUESTIONS	MARKS
	[Ch 4: Project 4: Home Automation]	
10	What is the function of a Digital Multimeter and who commonly uses it? [Ch 4: Project 4: Home Automation]	2
11	Explain the function of a breadboard in circuit prototyping. [Ch 4: Project 4: Home Automation]	2
Section C Attempt 2 out of 3.		
12	What is the role of a programme in an automation system and why is it necessary? [Ch 4: Project 4: Home Automation]	3
	OR What steps are followed to program an Arduino Uno board to blink an LED? [Ch 4: Project 4: Home Automation]	
13	Explain the working of a motion detection sensor and state one practical application. [Ch 4: Project 4: Home Automation]	3
