

Mathematics Part 1 — Cbse Chapter Test — 20 Marks

Subject: Mathematics Part 1 | Class: Class 8

Total Marks: 20 | Time Allowed: 0h 40m | CBSE

General Instructions:

1. Read all questions carefully before answering.
2. All questions are compulsory unless stated otherwise.
3. Marks for each question are indicated on the right.
4. Write neatly and legibly.

Q.NO.	QUESTIONS	MARKS
Section A Attempt all 8 questions. Each carries 1 mark(s).		
1	Why was the Mesopotamian system not considered a fully developed place value system? (A) It had no concept of zero (B) Blank spaces created ambiguity in reading numbers (C) It used too many symbols (D) It could not represent large numbers <i>[Ch 3: A Story of Numbers]</i>	1
2	What is the term used for multiplication by parts, as referred to by Brahmagupta? (A) Lilavati (B) Khaṇḍa-guṇanam (C) Brahmasphuṭasiddhānta (D) Ista-gunana <i>[Ch 6: We Distribute, Yet Things Multiply]</i>	1
3	Assertion (A): In a mixture of 40 kg containing sand and cement in the ratio 3:1, the weight of sand is 30 kg. Reason (R): The weight of sand is calculated as $(3/(3+1)) \times 40 = 30$ kg. (A) A is false but R is true. (B) A is true but R is false. (C) Both A and R are true, and R is the correct explanation of A. (D) Both A and R are true, but R is NOT the correct explanation of A. <i>[Ch 7: Proportional Reasoning-1]</i>	1

Q.NO.	QUESTIONS	MARKS
4	All odd numbers can be written as which of the following? (A) Sum of two consecutive numbers (B) Sum of three consecutive numbers (C) Product of two consecutive numbers (D) Sum of four consecutive numbers <i>[Ch 5: Number Play]</i>	1
5	When two even numbers that are NOT multiples of 4 are added, the result is always: (A) A multiple of 4 (B) An odd number (C) A multiple of 2 but not of 4 (D) Not divisible by 2 <i>[Ch 5: Number Play]</i>	1
6	Assertion (A): The opposite sides of a rectangle are parallel to each other. Reason (R): The diagonals of a rectangle are perpendicular to each other. (A) A is false but R is true. (B) Both A and R are true, but R is NOT the correct explanation of A. (C) Both A and R are true, and R is the correct explanation of A. (D) A is true but R is false. <i>[Ch 4: Quadrilaterals]</i>	1
7	What is a trapezium? (A) A quadrilateral with all sides equal (B) A quadrilateral with at least one pair of parallel opposite sides (C) A quadrilateral with opposite sides parallel and equal (D) A quadrilateral with diagonals perpendicular to each other <i>[Ch 4: Quadrilaterals]</i>	1
8	Given $125^2 = 15625$, what is the value of 126^2? (A) $15625 + 126$ (B) $15625 + 26^2$ (C) $15625 + 253$ (D) $15625 + 251$ (E) $15625 + 51^2$ <i>[Ch 1: A Square and A Cube]</i>	1
Section B Attempt all 3 questions. Each carries 2 mark(s).		
9	Write the formula for the nth odd number and use it to find the 36th odd number. <i>[Ch 1: A Square and A Cube]</i>	2

Q.NO.	QUESTIONS	MARKS
10	List any two properties of a rectangle. <i>[Ch 4: Quadrilaterals]</i>	2
11	For 120 students, a cook makes 15 kg of rice. If only 80 students attend, how much rice should be made using proportional reasoning? <i>[Ch 7: Proportional Reasoning-1]</i>	2
Section C Attempt 2 out of 3.		
12	Define a square. Explain why every square is also a rectangle. <i>[Ch 4: Quadrilaterals]</i>	3
	OR What pattern do you observe when adding consecutive odd numbers starting from 1? Show how this pattern gives the first five square numbers. <i>[Ch 1: A Square and A Cube]</i>	
13	State the three rules for parity when adding or subtracting odd and even numbers. Using these rules, determine whether $43 + 37$ is even or odd without calculating the sum. <i>[Ch 5: Number Play]</i>	3
